- > PHYSICAL, TACTICAL & TECHNICAL DATA
- > INTERACTIVE CONTENT
- > CUSTOMISABLE AND FLEXIBLE

PROZONE3 is the industry's leading player tracking system and provides a unique physical, technical and tactical coaching tool using multiple cameras installed within a stadium.

PROZONE3 is footballs leading performance analysis system. It enables coaches and management staff to analyse physical, technical and tactical performance information through an interactive and engaging coaching tool.

PROZONE3 provides an unparalleled level of performance information and presents it through a rich and engaging format that has been designed alongside leading coaches and managers. PROZONE3 is the only player tracking system of its kind to have been independently validated and is widely used for comprehensive post-match analysis of performance by some of the biggest clubs in the world including Arsenal FC and Real Madrid.

> PRECISE PLAYER TRACKING

PROZONE3 is the only player tracking system to have been independently validated. Our data capture system incorporates 8-12 digital IP cameras strategically positioned throughout the stadium. We then use a patented tracking process to produce comprehensive positional and physical information within PROZONE3 software.

This process has been independently validated by leading academics and practitioners throughout Europe, which is why PROZONE3 represents the most precise player tracking system available in the industry.

> PHYSICAL, TACTICAL & TECHNICAL DATA

PROZONE3 provides 2D animation and video-enhanced physical, technical and tactical performance insights. With such a breadth of player tracking and statistical match event information, PROZONE3 offers a level of physical, technical and tactical data that's unmatched by any other performance analysis application.

PROZONE3 allows management and coaching staff to objectively and reliably analyse every aspect of the game including team, unit and player analysis, presented through interactive distribution maps, 2D animation and video clips. The interactive presentation makes this wealth of performance information easy to understand and simple to navigate.

> INTERACTIVE CONTENT

PROZONE3 is an interactive performance analysis tool with multiple layers of content. PROZONE3 provides management and coaching staff with a multi-layered, interactive coaching tool via a rich and engaging interface. Like MATCHVIEWER, it presents data via distribution maps linked to video, but uniquely in PROZONE3 users have access to an interactive 2D recreation of the game.

Over the years we've worked with some of the most respected managers, coaches and match officials in the game. By getting their insights and feedback, we've been able to constantly refine and improve PROZONE3 and make it the most engaging and interactive system available for post-match analysis.

> CUSTOMISABLE AND FLEXIBLE

We know that each of our clients need different things from PROZONE3. So you can choose how your performance information is displayed. You can change player thresholds, check player ratings and view video and performance statistics for any period of the game. You can also interrogate and benchmark every aspect of the performance data available through PROZONE3 via associated applications such as DASHBOARD and TREND.
